

1 convert fahrenheit into celsius

```
#include <stdio.h>
float main() {
float C, F;
printf("Enter the temperature in F");
scanf("%f", &F);
C = (F - 32) * 5/9;
printf("%f fahrenheit is equal to %f celsius", F, C);
return 0;
}
```

```
Enter the temperature in F132
132.000000 fahrenheit is equal to 55.555557 celsius

=== Code Exited With Errors ===
