

## 1 total and average in three subjects

```
#include <stdio.h>
int main() {
    int s1, s2, s3, total;
    printf("Enter the marks of three subjects: ");
    scanf("%d%d%d", &s1, &s2, &s3);
    total = s1 + s2 + s3;
    average = total / 3;
    printf("total = %d\n average = %f",total, average);
    return 0;
}
```

```
Enter three subject marks: 89
91
87
total = 267
average = 89.000000
